Career Summary

Marlothii Conservancy

Freelance Web Designer and Developer

March 2022 - May 2022

Designed and developed single page websites for a non-profit organization using HTML, CSS and Javascript as well as implemented Google Analytics to allow tracking and analysis of user data. Communicated effectively with non-technical clients in order to iterate over the design as well as set up the necessary tools to allow monitoring of their website's growth.

Cybersmart

Web Developer

Nov 2018 - Jul 2020

Responsible for implementing changes to web pages using PHP and MySQL, as well as designing and developing new pages. Coordinated with the Technical Director and clients in order to implement changes effectively and accurately.

HomeImprovement4U

Data Entry and Web Scraper

Aug 2016 - Jul 2018

Originally hired for data entry, I quickly took on the role of web scraper, using Python to automate gathering of business data to populate the website's database in addition to my duties manually entering the data into the database.
