Career Summary

Ceramic Industries
Freelance Airtable and Webflow Support
June 2023 - Current
Successfully maintained and developed Airtable automations to streamline daily operations. Responsible for implementing and refining pages on the internal Ceramics Industries website.

Freelance Web Designer and Developer
May 2022 - Current
Worked on various projects with a diverse range of clients, using Wordpress, PHP, HTML, CSS and Javascript to take websites from all stages of the web development process to completion.

Marlothii Conservancy
Web Designer and Developer
March 2022 - May 2022
Designed and developed single page websites for a non-profit organization using HTML, CSS and Javascript as well as implemented Google Analytics to allow tracking and analysis of user data. Communicated effectively with non-technical clients in order to iterate over the design as well as set up the necessary tools to allow monitoring of their website's growth.

Cybersmart
Web Developer
Nov 2018 - Jul 2020
Responsible for implementing changes to web pages using PHP and MySQL, as well as designing and developing new pages. Coordinated with the Technical Director and clients in order to implement changes effectively and accurately.

HomeImprovement4U
Data Entry and Web Scraper
Aug 2016 - Jul 2018
Originally hired for data entry, I quickly took on the role of web scraper, using Python to automate gathering of business data to populate the website's database in addition to my duties manually entering the data into the database.
